2.	Maybe Not												X										1	5%
3.	Maybe Yes	X							X											X			3	14%
4.	Absolutely Yes		X	X		X	X	X		X	X	X		X	X	X	X	X	X		X	X	16	76%
Total Respondents																				21	100%			

Please let us know in total: *We sampled responses from a total 21 kids. The sample comprised of 7 kids from each of the 3 schools/teams*

B. Some comments what they like and what they think after climbing: *Generally, the kids gave positive comments of their experience in the new sport as exciting and all new. Here we take the best and unique comments.*

“I played all kinds of games as a kid before I lost my sight. Even now I like discovering new things and going to difficult places. Our home is very hilly and I found it easy to clime the walls.”

“I don’t fear doing crazy things. I have always wanted to discover new things. When are you bringing us back to the gym? I wish you can construct such a thing at our school. I undertake sports at school but this rock climbing is new and enjoyable. I have the confidence to compete with others. We want more training to become experts like Koba”

“At first I was so scared up there and thought I will fall. Now I feel like an expert like Koba. This climbing is simple and fun”

“My orientation and mobility is not good. I fell off a tree when I was young. Since my friends were doing it I had to be brave and at least try so they do not laugh at me.”

“I feared the height and thought I could fall. I get scared in new places the first time”

“I had never climbed trees and rocks before and I hope I can try again sometime”
